- Power over Ethernet junction box
- Power adapter
- Up to 30 meters (100ft) of outdoor CAT 5e cable
- Install wireless modem to TV tower or J-mount
- Single arm mount satellite dish style mount or TV Tower brackets for radio mounting
- 4 cable connectors
- Alignment of radio and confirmation of signal strength
- Drilling of hole/insertion of cable/and sealing of hole to one exterior wall location
- Junction box will be located within 3 meters of exterior wall hole
- Mounting of power-over-Ethernet junction box at point of entry
- up to 2 hours of installation labour
- Limited 30 day warranty on installed components against workmanship\*

In many case the premise owners may desire other services such as extra connections, software or firewall configuration etc., No Limits Communications will be happy to supply these products or services. If work is performed at the time of install a discounted rate of \$65/hour which is \$10/hour off our regular rate of \$75/hour. The discounted rate does not apply to any additions that require a second trip to the customers premiss's.

In some instances it may not be known until installation is completed if a high gain antenna or specialized mounting will be required. The installer will inform the premise owner at the earliest possible time of the need for any additional equipment or additional costs. This then must be approved by the customer before completion of work.

The technician will recommend the best locations for installation, however installation of antenna or wireless modem is not guaranteed against new obstructions (i.e. buildings or tree growth etc.).

The basic installation does not include parts or additional labour for some of the following commonly requested items. Listed cost are estimated only and may vary.

Computer network card installation and configuration	\$35
Email program configuration and setup	\$25-\$50
Extra out door cable to radio modem	\$1.25/meter
